Certificate

Google Cybersecurity

Those who earn the Google Cybersecurity Certificate have completed eight courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for entry-level roles in cybersecurity. They are competent in beginner-level Python, Linux, SQL, Security Information and Event Management (SIEM) tools, and Intrusion Detection Systems (IDS). They know how to identify common cybersecurity risks, threats, and vulnerabilities, as well as the techniques to mitigate.

Human Resources
Management Capstone: HR
for People Managers

Apr 20, 2025

Thomas KC

has successfully completed the online, non-credit Specialization

Human Resource Management: HR for People Managers

In this Specialization, learners developed essential human resources skills to become more effective people managers, including elements of recruiting and hiring employees, motivating and retaining employees, managing employee performance, and compensating and rewarding employees. The specialization presents applied knowledge that is grounded in academic research, which is especially valuable because managing people involves complex responsibilities. Learners completed a Capstone Project at the end of the Specialization to apply their new knowledge and skills.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
